# *Visionary* Beginnings

The visionary glimpse of what **EcoStar** is today began in the early 1970's with the development of the formulation of Starloy. This base formula of recycled rubber and plastic is the foundation for the injection-molded roofing tiles that were first compounded and molded by Staroba Plastics in 1993. Still manufactured by the Staroba family, **EcoStar** tiles continue to lead the industry as the most durable, sustainable and beautiful synthetic slate or shake roofing tiles on the market.

# Sustainable Roofing

Commit yourself to a better future and experience the beauty of sustainable design. Dedicated to using existing materials, **EcoStar** manufactures its roofing tiles with an 80% recycled compound that includes rubber and plastic polymers. Utilizing **EcoStar** products preserves valuable natural resources. No trees are used and no slate quarried to create **EcoStar's Seneca Shake** and **Majestic Slate** tiles. Due to **EcoStar's** very limited use of fillers, the tiles offer a very long life, backed by a 50-year warranty. This long life is one of the most important keys to sustainability.

# Original Beauty

## EcoStar Majestic Slate™

One of the original synthetic slate tiles, **Majestic Slate** continues to offer the beauty and durability of slate with the lightweight, environmental qualities that make it one-of-a-kind. In two different sizes and ten colors this slate tile is perfect for any building from residential to commercial to historic. Live with the best – **Majestic Slate**.

# *Tradition* Reinvented

## EcoStar Seneca Shake

Tradition is reinvented with the possibilities of **Seneca Shake**. The look of shake, with the longevity and fire-protection of modern technology, has created a new tradition that offers protection and durability combined with outstanding beauty. The combination of our two thicknesses and three widths has created the Aspen Blend – only available with **EcoStar**.

*Beaver Tail*

*Chisel Point*

*Beveled*

# *Imagination* Unleashed

EcoStar Majestic Slate™

Designer Series

Attention to detail is an attribute that comes first at **EcoStar**. Those with a keen sense of color and architectural design can enjoy the multitude of profiles and hues offered with **Majestic Slate Designer Series**. The unique shapes and color palette of Beaver Tail, Beveled and Chisel Point profiles accentuate a distinguished look like no other.

# *Certified* Craftsmanship

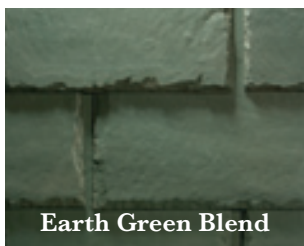

## EcoStar Gold Star Warranty

True sustainability depends on true craftsmanship. The Gold Star contractor program has shown for over 12 years what strong partnerships between manufacturers and contractors can bring to home and building owners alike. **EcoStar** continues to certify and train roofing contractors known for excellent craftsmanship and business practices. Only these contractors can install the Gold Star 50-year labor and material warranty. Using the strongest roofing materials in conjunction with the best installers leads to a long-lasting, sustainable roof that is truly a thing of beauty.

# EcoStar Color Blends

Note: Sample pieces, photographs or color samples may not accurately represent the true color level or variations of color blends that will appear on the roof. Before installation, ten tiles or so should be laid out and reviewed for conformity to desired color level. If color levels are unsatisfactory, advise your dealer before proceeding with installation. Colors and specifications subject to change without notice. EcoStar is not liable for color variations or shading. Tiles must be randomly blended by contractor for best results. Limited warranties carry terms and conditions. Contact your nearest EcoStar source for further information.

# EcoStar Accessories

**EcoStar** compliments its wide selection of roofing products with a strong accessory line that works in synergy on the roof for long-term durability.
