

A rustic log cabin with a dark grey shingled roof and exposed wooden beams. The cabin features a prominent gable roof with a small dormer window. The exterior is made of dark wood logs, and the interior is visible through large windows. The cabin is surrounded by lush green trees and a clear blue sky.

Sustainable Beauty

Made from 80% recycled materials.

Preserving the Future

EcoStar LLC leads the industry with its premium, steep-slope recycled slate and shake roofing tiles. EcoStar™ products exceed quality standards in the roofing industry and are the environmentally responsible choice for contractors, specifiers, architects and property owners.

Sustainability

EcoStar is manufactured with an 80% recycled compound of post-industrial rubbers and plastics. Additionally, the production of EcoStar tiles diverts millions of pounds of scrap rubber and plastic from landfills annually.

Preservation

The production of EcoStar tiles preserves natural resources. No trees are used in the creation of Seneca Shake™ and no stones quarried for the manufacturing of Majestic Slate™.

Durability

Manufactured utilizing highly flexible materials, EcoStar offers long-term strength and durability. Available with a 50-year transferable warranty, including Class A Fire and Class 4 Impact Resistance ratings, EcoStar provides superior protection from harsh weather conditions.

LEED® certification

USGBC's Leadership in Energy and Environmental Design (LEED) is the national standard for the development of high-performance green buildings. EcoStar tiles are highly sustainable and can contribute toward LEED certification. Ask your representative or visit www.ecostarllc.com to review the LEED points your building may be eligible for with EcoStar.

Energy-saving possibilities

Consider adding EcoStar ENBase insulation beneath the tiles and increase your home's protection from energy loss through the roof. Insulation may be eligible for federal tax credits.

Green

Advantages

- 80% recycled compound of post-industrial rubbers and plastics
- Reduce post-industrial waste in landfills
- Preserves natural resources
- 50-year transferable warranty available
- Class C fire rated, Class A rating available
- Contributes toward LEED certification

EcoStar offers a variety of roofing choices
